

■ Features

- 4"×2" compact size
- Medical safety approved (2 x MOPP) according to ANSI/AAMI ES60601-1 and IEC/EN60601-1
- Suitable for BF application with appropriate system consideration
- Cooling by free air convection
- EMI class B for class I configuration
- Extremely low leakage current
- Protections: Short circuit / Overload / Over voltage
- 3 years warranty

■ Applications

- Oral irrigator
- Hemodialysis machine
- Medical computer monitors
- Sleep apnea devices

■ Description

RPD-60 is a 60W highly reliable green PCB type medical power supply with a high power density on the 4" by 2" footprint. It accepts 90~264VAC input and offers dual output voltages .

RPD-60 is able to be used for Class I (with FG) system design. The extremely low leakage current is less than 150µA. In addition, it conforms to international medical regulations (2\*MOPP) and EMC EN55011.

NOTE	<p>1. All parameters NOT specially mentioned are measured at 230VAC input, rated load and 25°C of ambient temperature.                  2. 33% Duty cycle maximum within every 30 seconds. Average output power should not exceed the rated power.                  3. Ripple &amp; noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1μf &amp; 47μf parallel capacitor.                  4. Tolerance : includes set up tolerance, line regulation and load regulation.                  5. Touch current was measured from primary input to DC output.                  6. The ambient temperature derating of 3.5°C/1000m with fanless models and of 5°C/1000m with fan models for operating altitude higher than 2000m(6500ft).                  7. Length of set up time is measured at cold first start. Turning ON/OFF the power supply may lead to increase of the set up time.                  8. Heat Sink HS1, HS2 can not be shorted.                  9. The power supply is considered a component which will be installed into a final equipment. All the EMC tests are been executed by mounting the unit on a 360mm*360mm metal plate with 1mm of thickness. The final equipment must be re-confirmed that it still meets EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." ⊥ : Grounding Required

- 1.HS1,HS2 cannot be shorted.
- 2.M1 is safety ground. For better EMC performance,  
Please secure an electrical connection between  
M1,M2 and chassis grounding.
